**AUTO** **AUTOSTOP**

Stops when the fixing is secured. Ideal for driving anchors or concrete screws without danger of overtightening or thread-stripping.

**PULSE MODE**

Slow pulsing rotation is perfect for removing screws with stripped or damaged heads, particularly from old floors and stud walls.

**SELF TAPPING MODE**

Designed to start fast to enable the screw to cut into the surface, before slowing down to prevent damage. Ideal for corrugated roofs.

**1** **50Nm/750RPM**

Low torque mode for applications requiring precision over power for fixing into more delicate materials.

**2** **210Nm/2100RPM**

Mid torque, medium speed mode for those jobs requiring a little more force.

**3** **280Nm/3000RPM**

High torque, high speed mode for heavy duty applications and large fastenings.

## OUR PROFESSIONAL OPINION

There's no substitute for the professional opinion of the trade professionals. After all, they put AEG powertools through the toughest tests on the jobsite, day after day.

KEVIN FEIST  
WINDOW FITTER  
5 YRS IN THE TRADE

"We have now equipped all our technicians with the new battery devices in order to go wireless and exchange the corded machines. I have great experiences with it [PRO18V] because you can actually say it's the first system where you can really effectively swap the tools and replace corded machines. The HD batteries give a lot more juice, more energy that hasn't been seen before in batteries. You can work for longer, and the weight of the batteries is relatively low."

JOE MALCOLM  
SITE MANAGER AND PLASTERER  
11 YRS IN THE TRADE

"From AEG tools what we've found that we really like is the power that you get from the tools. The HD batteries we've found is your just getting that little bit more out of the tool...It is giving you that little bit more power, that little bit more runtime. Because most of the site is AEG you can just grab an AEG battery wherever you are. It's just very handy to run the site off the same battery platform."

OLIVIER DAVID  
CONSTRUCTION BUSINESS OWNER  
33 YRS IN THE TRADE

"Before working with the AEG range I was using mostly Bosch tools which didn't give me the same product satisfaction or service satisfaction, or versatility. So that's why I trust AEG now."

FABIAN BIHLMAYER  
OWNER, JOINER & KITCHEN FITTER  
8 YRS IN THE TRADE

"My favorite tool was the electric planer. It's battery powered, doesn't need cables it's easy to handle and we can work more quickly and efficiently on site."

PASCAL POIRIER  
ARTISAN ROOFER  
23 YRS IN THE TRADE

"My favourite tool is the battery powered 125mm grinder because it's very light, very functional and I use it a lot in places like little nooks that are inaccessible with extension leads. So that's my favourite little tool."

TOBY COLDECOTT  
JOINER  
20 YRS IN THE TRADE

"The multi-tools is absolutely fantastic. Very, very light, and very, very nimble. It really is a good bit of kit."

\*Some of the AEG products were provided to the tradesmen free of charge prior to giving testimonials. All testimonial however are a true opinion of the tradesman based on their experiences with AEG tools.
